Ball Corporation Hires Local Construction Company

Denver, CO -- July 29, 2005 -- **dcb Construction Company, Inc.**, a locally owned and operated construction company since 1960, was recently awarded Ball Corporation's 34,500 square foot addition to their existing container facility located in Golden, Colorado. Construction on this design-build project begins August, 2005 and is scheduled for completion December, 2005. This new addition marks the third time Ball has chosen **dcb** for their construction needs. The building is a pre-engineered metal building supplied by Butler Manufacturing, the leader in systems construction since 1901.

Ball Corporation acquired Jeffco Manufacturing Company in 1969 and today this Golden plant, the first of Ball's metal beverage container plants, is a leading supplier of aluminum soft drink cans in the Rocky Mountain region. Its large can end manufacturing center provides beer and soft drink ends to customers throughout the Western United States. The company also owns Ball Aerospace & Technologies Corp. which develops sensors, spacecraft, systems and components for government and commercial markets. Ball employs more than 13,500 people worldwide and reported 2004 sales of \$5.4 billion.

A Colorado builder since 1960, **dcb Construction Company, Inc.** began concentrating on design-build projects from its inception and today is ranked one of Colorado's premier top ten design-build firms by Colorado Construction Magazine, 2005. **dcb** is currently celebrating its 45th anniversary of providing design-build construction services throughout the state of Colorado.
